

The FCC should be safeguarding the airwaves for the benefit of the public, not selling the airwaves for the benefit of a few huge corporations. You're doing the very thing you're supposed to be preventing others from doing.

Rescind your vote. Make centralized control of the media more difficult to attain, not less difficult.

This is a democracy. More voices is better than fewer. More access to media is better than less. Control of information by an elite few is un-American, dangerous and immoral.
Thank you.
